Silicone will withstand areas of ponding water without softening, bubbling or peeling from the substrate. Acrylic, urethane and asphalt roof coatings decompose and wear away from the stress of harsh sunlight, UV rays, and freeze-thaw cycles. Silicone's unique chemistry creates a coating that will not degrade under ultraviolet light or from weather conditions. Silicone is an inert material, and does not decompose. As acrylic and urethane coatings age, they become dirty and stained from exposure to blowing debris, dust and dirt. The coatings require recoating to maintain a clean appearance. The smooth surface of GacoRoof silicone roof coating offers excellent resistance to mold, mildew and staining and does not require recoating. GacoRoof's reflective white surface resists ozone and UV rays.

PLUMBING/HEATING

Because a typical kitchen countertop must withstand a range of abuses from vegetable chopping to plant potting yet remain smooth and sanitary with the wipe of a sponge, different work centers may call for unique surfaces. Consider the alternatives, then tailor each countertop to its specific purposes.

There are several ways to purchase countertops, depending on the material and your budget. Some laminates are available prefabricated in standard sizes; however most countertops are built to specifications.

Your countertop will be made at our countertop manufacturing facility by experienced professionals. Pick the style right for you! For kitchen, vanity or bar - in dozens of popular color options.

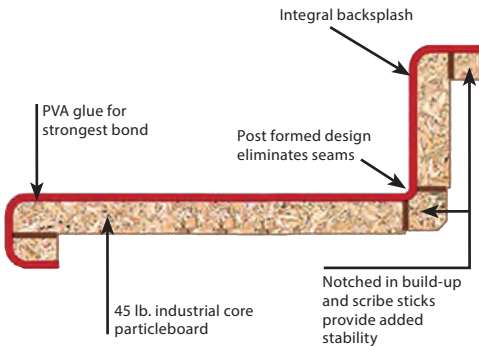

Countertop Colors (Subject to manufacturer's updates)

There's a PEX Fitting System For Every Plumbing Job...Production, Prefabrication or No-Flame Repair PEX Crosslinked Polyethylene Tubing

PEX tubing's versatility makes it perfect for many residential, commercial and industrial applications. It not only meets ASTM standards, but goes well beyond these requirements. PEX will handle all normal temperatures and pressures for residential potable water systems and radiant floor heating applications. PEX tubing stays flexible at all temperatures. It is easy to install year round. PEX tubing is practically inert. Nothing sticks to it. This means PEX resists mineral buildup, rust, corrosion, and electrolysis. PEX piping can be connected to galvanized, copper, polybutylene and CPVC systems with standard Sharkbite fittings. Here are just a few of the advantages offered by PEX tubing:

Trouble-Free PEX Tubing

- Flexible
- Corrosion resistant
- No electrolysis
- Freeze damage resistant

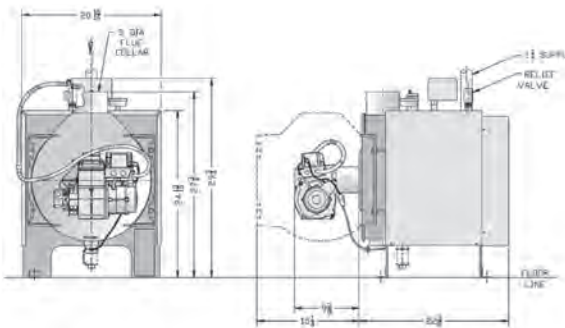

Crimp and Thread Connections

- No exotic parts to fail
- No solvents, bonding agents or "glues" used
- No flame, no solder, flux or gas used
- More positive connections, quicker, easier

SBS has everything you need for new and old sink replacement. These helpful diagrams identify the parts involved in sink replacement.

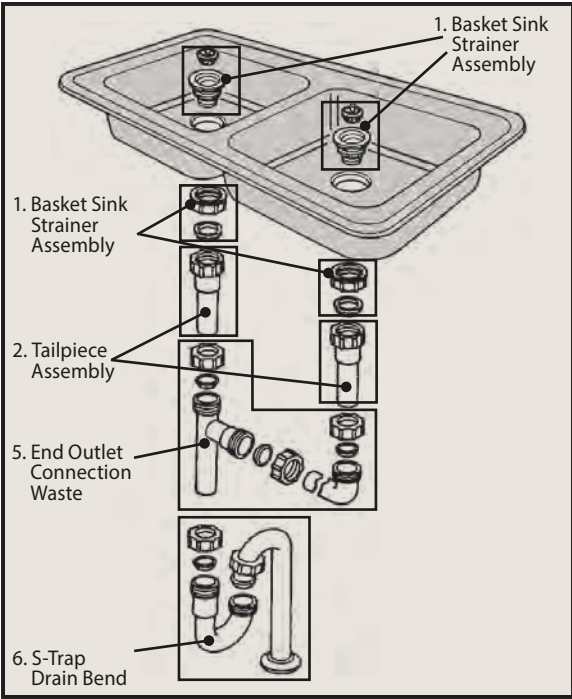

1. Measure the sink now in place. Note how many holes it has for faucets and hose sprayers as well as the distance these holes are apart. Example: If your kitchen faucet is a two-handle unit, the holes for the hot and cold are normally 8 inches apart.
2. Remove the trap assembly from the old sink by turning the top slip nut at the trap and tailpiece connection. If a garbage disposer is involved, turn off the power at the main electrical service entrance. Disconnect the power wires to the disposer and then unscrew the bolts that hold the disposer to the sink drain.
3. Turn off the water either at the supply stop valves at the bottom of the sink or at the main water service entrance.
4. Disconnect the water supply at the faucets. Remove bracket hardware from underneath the countertop if needed. Lift the sink out of the countertop hole.
5. Clean the countertop and set the new sink into position in plumber's putty. You may be able to connect the faucet assembly and the drain basket and tailpiece before you set the sink into the countertop.
6. If the sink is held by brackets, install them at this point.
7. Connect the faucet to the water supply pipes. Install the disposer to the sink drain opening with a bolted flange. Reconnect the wires and attach the unit to the trap. If there is no disposer, attach the tailpiece of the sink drain to the trap assembly.
8. Use plumber's putty to bed sink drains - it is recommended that you use stainless steel putty if the sink is stainless steel, to avoid spotting and damaging the surface.
