Build With Our Experience

As Alaskans we understand the challenges of building in Alaska. A short building season, limited transportation and the weather all play into your construction schedule.

100% Guarantee of Your Satisfaction

Call us anytime if any product does not meet your complete satisfaction. We'll issue a replacement product, a credit or your money back.

ORDERING FORMS ON PAGES 34-36

ORDERING INSTRUCTIONS

Bank Drafts, money orders, and personal checks are the safest method of payment. Spenard Builders Supply cannot be responsible for cash sent through the mail. When using VISA, MasterCard, Discover, American Express or SBS Credit Card, do not send your card. Be sure all information is complete, including expiration date and card number. All members of the same household should order under the same name. Signature of buyer must accompany order. All merchandise must be paid in full prior to shipment unless other arrangements have been made. Credit applications for a Spenard Builders Supply charge account are available upon request.

SHIPPING INSTRUCTIONS

When necessary to package merchandise for proper shipping, crating will be added to your bill. SBS is not liable for items lost in the mail. Claims must be made to the U.S. Post Office.

DAMAGES OR SHORTAGES

Catalog orders are shipped F.O.B. Spenard Builders Supply, Anchorage, Alaska. Should merchandise for freight savings be available, we reserve the right to ship from any of our branch locations near you or our distribution center in Tacoma, Washington. In case of shortage or damage, notify the delivering transportation agent at once and file claim promptly. Any delay may cause you a loss. Spenard Builders Supply requires notification of shortages within (7) days of receiving your shipment.

WARRANTY

All General Electric and Whirlpool appliances have a one-year parts and labor warranty. Warranty work will be provided at the nearest factory authorized service center. Spenard Builders Supply is not liable for shipment charges to factory authorized service centers.

PRICES

Prices in this catalog are current F.O.B. Anchorage at the date of publication. All prices are subject to change without notice. Special price quotations are available on volume shipments. Flexible Caribou Cabin!

Starting at 12'x16' with OSB panels you choose how big or small to build. Substitute window, door, or wall panels to suit your personal design.

The Caribou Cabin is customizable with a variety of panel options. The panels are 4' wide, so you can enlarge the building to fit your needs with these panels:

- Field Panel- Solid faced panel
- Door Panel-Cut out for a 3'0" exterior door
- Window Panel-Openings cut to fit various windows sizes based on your needs
- Corner Panels-Left and right panels
- All panels are available with your choice of T1-11 or OSB siding

Portable! Most components weigh less 100# and can be handled easily by two people. The 16'x20' kit pieces can be transported without heavy equipment

Multiple Finish Options! Finish options include insulation, drywall, paneling, electrical, floor coverings and ceilings

Recreational Cabins

Easy to ship, easy to build. Many options to choose from. Our traditional stick frame cabin kit offers you the advantage of a pre-cut and marked package. A detailed set of drawings and written instructions are provided to ensure successful construction of the package.

SBS has the options to fit your needs; piling foundation, insulation, interior finishes and trims, decks, and interior electrical and plumbing. Build the shell this summer and add on options to finish your cabin between salmon runs. Pricing FOB Anchorage. (Allow 4 weeks to manufacture.)

Permanent Wood Foundation (PWF) System is a treated plywood and lumber foundation that installs in any weather. Builders have discovered advantages to include: savings in scheduling; installation by carpentry crews; reduction in material costs, especially where concrete is a premium, and easy to insulate and finish as a conventional frame wall. The PWF system is all about quality, strength, ease of installation and comfort.

LP proudly offers a complete line of products to help you manufacture better outdoor structures with outstanding durability, value, beauty and flexibility!

ColorStrand

ColorStrand combines Northwest Factory Finishes' Proprietary processes with innovative equipment and specially-formulated PPG DURACOLOR machine applied finish. The result is a beautiful and extremely durable finish with exceptional consistency and a 30 year limited coating warranty. Northwest Factory Finishes is recognized by LP Corp. as a preferred prefinisher.

ColorStrand Deep Grain Collection employs a specialized two tone coating process that enhances the authentic cedar texture of LP SmartSide with depth and character. There are several unique colors available in stock on both LP SmartSide Lap siding and Great Random Shakes. Shakes are a full shade darker than the corresponding lap so that they provide an additional accent when paired together. This coating process cannot be reproduced by an onsite painter promising to make your home distinct.

Contact your local SBS for availability in your market.

Monogram® Vinyl Siding

Monogram™ provides the look of wood siding, but does not require the upkeep common to wood. Monogram siding is manufactured with TrueTexture™ rough cedar finish molded directly from real cedar boards. Available in a selection of profiles, Monogram offers the industry's widest selection of colors. It is appropriate for use in new construction for single family homes, multi-housing projects and light commercial developments. Monogram is also an ideal product for remodeling.

- **STUDfinder™:** The patented STUDfinder Installation System combines precisely engineered nail slot locations with graphics. Nail slots are positioned 16" on center to allow for alignment with studs. STUDfinder graphics centered at each slot provide a quick and easy guide to help locate studs.

- **RigidForm™:** Monogram RigidForm 220 technology has a stiff, double-thick .092" nail hem for a straighter-on-the-wall appearance and wind load performance.

Silicone will withstand areas of ponding water without softening, bubbling or peeling from the substrate. Acrylic, urethane and asphalt roof coatings decompose and wear away from the stress of harsh sunlight, UV rays, and freeze-thaw cycles.

Silicone's unique chemistry creates a coating that will not degrade under ultraviolet light or from weather conditions. Silicone is an inert material, and does not decompose. As acrylic and urethane coatings age, they become dirty and stained from exposure to blowing debris, dust and dirt. The coatings require recoating to maintain a clean appearance. The smooth surface of GacoRoof silicone roof coating offers excellent resistance to mold, mildew and staining and does not require recoating. GacoRoof's reflective white surface resists ozone and UV rays.

GacoRoof Silicone Roof Coating

- 100% silicone
- Ideal for most roof surfaces
- Withstands permanent ponding water
- Can be applied between 32F and 120F
- Not mailable

GacoRoof Elastomeric Roof Coating

- Two gallons of GacoElastomeric provides the same coverage as a 5-gallon pail of most acrylic elastomerics, plus the added benefits and protection of a Gaco Silicone:
- **BETTER COVERAGE.** Higher solids than acrylics, more coating stays on the roof. One 2 gallon container of GacoElastomeric covers 100 sq. ft.
- **CURES FAST.** Can be rained on after just 2 hours and won't wash off the roof.
- **WITHSTANDS PONDED WATER.** Acrylics begin to soften in as little as 24 hours.
- **REMAINS PERMANENTLY FLEXIBLE.** Acrylics become hard and brittle, and often crack and leak.
- **IDEAL FOR FLAT ROOFS.**
- **25-YEAR LIMITED MATERIAL WARRANTY.**
- Use it to protect large and small buildings, homes, garages, patio covers, sheds, barns, mobile homes, RVs and more.

Because a typical kitchen countertop must withstand a range of abuses from vegetable chopping to plant potting yet remain smooth and sanitary with the wipe of a sponge, different work centers may call for unique surfaces. Consider the alternatives, then tailor each countertop to its specific purposes.

There are several ways to purchase countertops, depending on the material and your budget. Some laminates are available prefabricated in standard sizes; however most countertops are built to specifications. Your countertop will be made at our countertop manufacturing facility by experienced professionals. Pick the style right for you! For kitchen, vanity or bar - in dozens of popular color options.

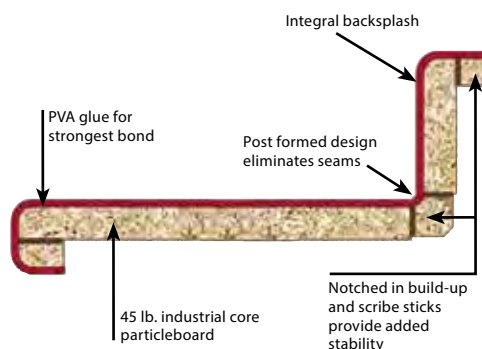

Countertop Colors (Subject to manufacturer's updates)

Colors available for kitchen and bath vanity.

Toyostove Kerosene Heaters Are Clean, Safe and Thermostat Controlled

A Laser Heater provides all the comfort and convenience of a central heating in one small, efficient unit at a fraction of the cost. It is also ideal for heating summer homes, hunting cabins, and is certified for installation in mobile homes and manufactured housing. The Laser heater combines the most advanced technology with the economy of kerosene heating. It features a simplified digital control panel that displays room temperature, temperature settings, time, and error codes. The unit is especially safe for children and pets as its cabinet is cool to the touch. All units feature a safety shut-off system. You can easily install a Laser heater in just an hour or two. The helpful owner's manual provides complete, step-by-step instructions. Several installation options are available. All units are U.L. approved for #1 fuel oil.

There's a PEX Fitting System For Every Plumbing Job...Production, Prefabrication or No-Flame Repair PEX Crosslinked Polyethylene Tubing

PEX tubing's versatility makes it perfect for many residential, commercial and industrial applications. It not only meets ASTM standards, but goes well beyond these requirements. PEX will handle all normal temperatures and pressures for residential potable water systems and radiant floor heating applications. PEX tubing stays flexible at all temperatures. It is easy to install year round. PEX tubing is practically inert. Nothing sticks to it. This means PEX resists mineral buildup, rust, corrosion, and electrolysis. PEX piping can be connected to galvanized, copper, polybutylene and CPVC systems with standard Sharkbite fittings. Here are just a few of the advantages offered by PEX tubing:

Trouble-Free PEX Tubing

- Flexible
- Corrosion resistant
- No electrolysis
- Freeze damage resistant

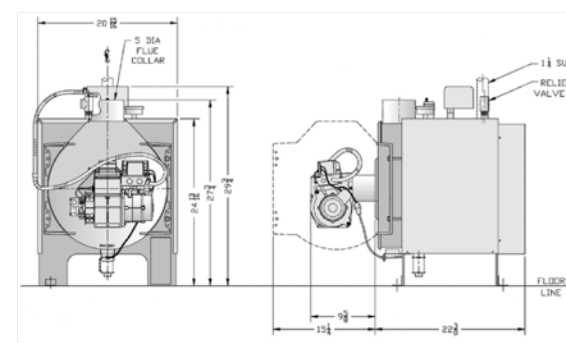

Crimp and Thread Connections

- No exotic parts to fail
- No solvents, bonding agents or "glues" used
- No flame, no solder, flux or gas used
- More positive connections, quicker, easier

ELECTRICAL

SBS has everything you need for new and old sink replacement. These helpful diagrams identify the parts involved in sink replacement.

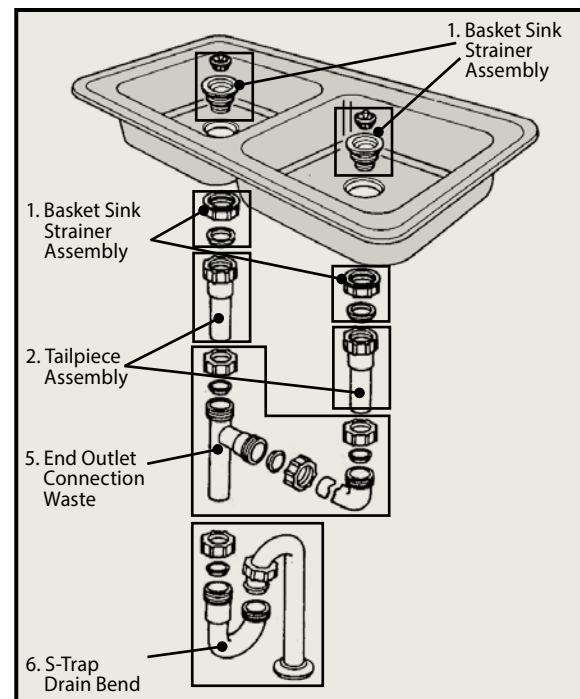

1. Measure the sink now in place. Note how many holes it has for faucets and hose sprayers as well as the distance these holes are apart. Example: If your kitchen faucet is a two-handle unit, the holes for the hot and cold are normally 8 inches apart.
2. Remove the trap assembly from the old sink by turning the top slip nut at the trap and tailpiece connection. If a garbage disposer is involved, turn off the power at the main electrical service entrance. Disconnect the power wires to the disposer and then unscrew the bolts that hold the disposer to the sink drain.
3. Turn off the water either at the supply stop valves at the bottom of the sink or at the main water service entrance.
4. Disconnect the water supply at the faucets. Remove bracket hardware from underneath the countertop if needed. Lift the sink out of the countertop hole.
5. Clean the countertop and set the new sink into position in plumber's putty. You may be able to connect the faucet assembly and the drain basket and tailpiece before you set the sink into the countertop.
6. If the sink is held by brackets, install them at this point.
7. Connect the faucet to the water supply pipes. Install the disposer to the sink drain opening with a bolted flange. Reconnect the wires and attach the unit to the trap. If there is no disposer, attach the tailpiece of the sink drain to the trap assembly.
8. Use plumber's putty to bed sink drains - it is recommended that you use stainless steel putty if the sink is stainless steel, to avoid spotting and damaging the surface.
